

MEETING REPORT

Team Name: Food Ordering System Project Team

Date of Meeting: 17 April 2026

Start Time: 12:40

End Time: 13:10

Meeting Location: E-012

Moderator: Arjola Sula

Recorder: Arjola Sula

Other Members Present: Xhesika Toska, Arjola Sula, Sofia Cala, Aurelio Hysenaj, Klara Hyrenaj, Erjus Allka

Members Absent: Imerr Meraj

Topics Discussed:

- The team presented the Collaboration Diagrams, focusing on how system components interact with each other through message exchange.
- Each member explained a specific scenario, highlighting object relationships and communication flow within the system.
- The team also presented the BPMN (Business Process Model and Notation) diagrams, illustrating business processes in a structured and standardized way.
- Discussion emphasized the importance of clearly representing workflows, decision points, and parallel processes in BPMN .

Decisions Made

- BPMN diagrams will be revised, especially improving lane organization and structure.
- Collaboration Diagrams will be corrected where needed to ensure accurate message

flow and interaction clarity.

- All diagrams must strictly match their corresponding Use Cases.
- Incorrect or unnecessary diagrams (e.g., analytics system) will be removed or redesigned.
- Team members will collaborate to review and improve all diagrams before final submission

Tasks Assigned:

All team members presented one Collaboration Diagram and one BPMN diagram related to their assigned system functionality.

Arjola Sula: Presented the main BPMN diagram of the system, focusing on the overall process flow and structure. She is responsible for improving the lane system and ensuring the diagram follows proper BPMN standards.

Sofia Cala: Presented the Collaboration Diagram for “Place Order”, explaining the interaction between the user and the system during the ordering process. The diagram clearly shows the message flow and system responses.

Xhesika Toska: Presented the Collaboration Diagram for “Payment History”, illustrating how users access and review their past transactions. The diagram highlights the interaction between user and system components.

Erjus Allka: Presented the Collaboration Diagram for “Complete Delivery”, focusing on the interaction between the delivery driver and the system. Improvements are needed to better represent the message flow and driver actions.

Klara Hysenaj: Presented the Collaboration Diagram for “Generate Financial Reports and Forecasting”, explaining how the system processes and generates financial data. The diagram needs adjustments to better match the use case.

Aurelio Hysenaj: Presented the Collaboration Diagram for “Restaurant Staff Views Sales Analytics”, showing how staff interact with the system to analyze sales data. The diagram may need to be revised or simplified based on feedback.

Time, Place, and Agenda for Next Meeting:

Next Meeting Date: 08 April 2026

Location: E-012

Agenda:

In this meeting, we discussed the task given for this week. We agreed that next week, the team will prepare and present the Interaction Overview Diagrams, focusing on clearly explaining the interaction flow within the system. Additionally, the team will provide the corrected BPMN diagrams, updated according to the guidelines published by the professor on Classroom.
